Re: Alkanes, C10-C13 (Short Chain Chlorinated Paraffins)

To the best of our knowledge and belief regarding the raw materials and production processes used, correctly identified and originally packaged PTFE products supplied by Vital Polymers do not contain alkanes, C10-C13 (short chain chlorinated paraffins).

A handwritten signature in black ink, appearing to read "R. G. Worley III". The signature is fluid and cursive.

R. Garrett Worley III
