Re: Statement on Suitability for Food Contact

We certify that our virgin PTFE shapes can be utilized in food contact applications as per the following regulations:

USA FDA, Department of Health and Human Services, 21 CFR Ch. 1: §175.105; §175.300; §176.170; §176.180; §177.1520; §177.1550(a)(1) and (b) – Perfluorocarbon resins; §177.2600; and §178.3570.

EU / UE EU/UE Directives 89/109, 82/711, 85/572, 2002/72/CE.

The user must verify that the items produced from our virgin PTFE shapes will be technically suitable for each particular application. The user must also verify that the finished item will not cause any modification to the organoleptic properties of the foodstuff.

A handwritten signature in black ink, appearing to read "R.G. Worley III". The signature is fluid and cursive.
